Introduction

This Familiarization Guide is designed to provide prospective examinees with information about the Hausa Defense Language Proficiency Test 5 (DLPT5) in constructed-response format. This guide contains general information about the test design, the format of the test, its length, its content, the skills tested, and procedures used in scoring and reporting the scores. In addition, screen shots of what the examinees will see when taking the test on the computer as well as information on testing procedures are provided.

Part 1 Overview of the DLPT5 Constructed-Response Test

The DLPT5 Constructed-Response (CRT) is designed to assess the general language proficiency in reading and listening of native speakers of English who have learned a foreign language as a second language, as well as native speakers of other languages with strong English skills. The DLPT5 tests measure proficiency as defined by the Interagency Language Roundtable (ILR) Skill Level Descriptions, levels 0+ through 4 (see Appendix). All DLPT5s are delivered via computer.

DLPT5s CRTs in many languages include both a Lower-Range Test and an Upper-Range Test. The Lower-Range Test measures ILR proficiency levels 0+ through 3, while the Upper-Range Test measures ILR proficiency levels 3 through 4. Examinees will normally take the Lower-Range DLPT5; those who receive a score of 3 on the lower range test may be eligible to take the Upper-Range Test, depending on the policy of their institution. The DLPT5 will be used to make operational readiness, incentive pay, and training decisions for civilian and military language analysts in the United States government.

1. Test design

The Lower-Range Reading Test contains 60 questions with about 30 authentic passages. Each passage has two questions. The reading passages will be presented in Latin script.

The Lower-Range Listening Test contains 60 questions with 30 authentic passages. Each passage has two questions and is played twice.

Examinees have 3 hours to complete the Reading Test and 3 hours to complete the Listening Test. Approximately halfway through each test, examinees will be given a 15-minute break. The break does not count toward the test time. For both the Listening Test and the Reading Test, examinees may take as much or as little time as they wish to answer the questions. Managing the time effectively is the examinee's responsibility.

2. Test content

The DLPT5 is designed to measure proficiency in the target language regardless of how it has been acquired. For this reason, and because of the broad proficiency orientation of the test, its content is not tied to any particular language-training program.

The passages included in the test are sampled from authentic materials and reallife sources such as signs, newspapers, radio and television broadcasts, the Internet, etc.

The passages cover a broad range of content areas, including social, cultural, political, economic, geographic, scientific, and military topics.

3. Test format

The test includes instructions for how to take the test, examples of how to answer the questions, and question sets containing the following parts:

Orientation: This is a short statement in English that appears before each passage. Its purpose is to identify the context from which the passage is taken.

Passage: This is the only element of the test that is in the target language being tested. The maximum length of a listening comprehension passage in the test is approximately 2 minutes. The maximum length of a reading comprehension passage is approximately 300 words. Most of the passages are much shorter than the maximum length.

Question statement: Each individual question is based on the passage, is written in English, and is posed in the form of a complete question or an incomplete statement. The questions may ask about what is explicitly stated in the passage or, in some cases, what is implied in it. Occasionally questions may ask about idioms or expressions that are used in the passage. There are usually two questions for each passage; some passages may have three questions.

Answer box: For each question, there is a box on the screen in which examinees type their answer in English. Examinees may also type notes in these boxes if they wish.

4. Scoring

Examinee scores are reported in terms of ILR levels, including "plus" ratings. Lower-Range Tests are intended to cover ILR levels 0+ through 3. Possible scores are 0, 0+, 1, 1+, 2, 2+, and 3. Upper-Range Tests are intended to cover ILR levels 3 through 4. Possible scores are 3, 3+, and 4. Separate scores are reported for Reading and Listening.

Scores on either type of test reflect current functional language proficiency in reading and listening as defined in the ILR Skill Level Descriptions (see Appendix). Scores do **not** reflect proficiency in speaking or writing, nor do they reflect examinees' job-related performance or ability to perform specific language-related tasks under special circumstance (e.g., reading or listening to a target language passage repeatedly with the aid of supplemental reference materials and information sources).

For the Lower-Range Test, scores will be based on the number of questions answered correctly at each ILR level. Each question targets a specific ILR level. Examinees generally have to answer at least 70% of questions correctly at a given level to be assigned that level. Examinees must pass each lower level in order to pass a higher level. Examinee answers will be evaluated by scorers trained by testing experts at the Defense Language Institute according to a detailed scoring protocol.

Scores on the Upper-Range Test will be based on the number of passages for which the examinee demonstrates comprehension. Each passage targets a specific ILR level. Comprehension of a passage is demonstrated by supplying certain information from the passage specified by the test's developers. Examinees generally have to demonstrate comprehension of at least 70% of the passages at a given level to be assigned that level. Examinees must pass each lower level in order to pass a higher level. Examinee answers will be evaluated by scorers trained by testing experts at the Defense Language Institute according to a detailed scoring protocol.

5. Preparing for the test

The purpose of this publication is to familiarize prospective examinees with the DLPT5 constructed-response format and general testing procedures. Other than carefully reading this guide so that the test instructions and format are familiar, there is very little to be gained from "studying" for the test. The best preparation for the DLPT5 is the acquisition of a solid base of general proficiency in the target language, both through formal training and through language exposure and use in a variety of real-life language-use settings. Examinees should know that study aids (i.e., dictionaries, reference books, etc.) are not permitted for this test.

6. Instructions for answering DLPT5 CRT questions

This section is meant to familiarize prospective examinees with how to answer DLPT5 Constructed-Response Test (CRT) questions. Sample Somali passages from ILR levels 1 through 3 in reading and listening with their associated questions and sample expected answers are presented in Part 3.

Answers should be complete and relevant. Examinees are not expected to write essays or word-for-word complete translations. An example passage with explanations is given below to illustrate the types of answers that would be expected to receive credit.

According to an official spokesperson, the government of Treden has started a new program to help solve the growing refugee problem there. The program, announced last week by the Tredenian Minister of the Interior, involves the resettlement of refugees to vacant apartment buildings in the Tredenian capital. These refugees are currently being housed in overcrowded camps near Treden's border with war-ravaged Norland. The camps were instituted in 2003 in response to the war. Since that time, the number and size of camps has grown, and the war is still going on. The average population of the camps is 3,000, and most camps were designed for at most 1,000 people. It is hoped that the new program will help alleviate this situation.

In order to receive credit, examinees must provide all the information requested. As stated above, answers should be complete and relevant:

Complete: Examinees must provide all the information requested to receive credit. The examinee must not leave out information that was included in the passage and could reasonably be expected as part of an answer to the question being asked. If, based on the above passage, there had been a question "What action was taken by the government of Treden?" a complete answer would include all of the information that the government started a program to resettle refugees from camps near the Norlandian border to vacant apartment buildings in the capital.

It would not be acceptable simply to write, "The government started a program," or "The government helped some refugees," or "The government supplied some people with apartments." Where the question is in two parts, such as "What action was taken by the government of Treden AND what was the reason for its action?" **Both** parts must be answered; i.e. the examinee must say both **what** action was taken and **why** the action was taken in order to receive credit.

Relevant: Examinees should not include information that does not answer the question, even if that information appears in the passage; the examinee's entire answer should relate directly to the question being asked. Examinees are not expected to write a word-for-word translation of large parts of the passage or even of the entire passage in response to a question.

With regard to the example passage cited above, if the question asks for the reason for the government's action, the examinee should not offer a translation of the last five sentences of the passage; even though that part of the passage contains the critical information, it also contains some extraneous information.

Sense: The examinee's response should make sense as an answer to the question asked. Examinees who use the text box for note-taking should ensure that they end up with a coherent answer that appears somewhere within the text box and that can be understood by an English-speaking rater.

Translation: As noted above, translation of the entire passage is not acceptable as the answer to any single question. Additionally, the strategy of translating pieces of the passage as answers to questions should be used with caution.

It is common for questions to require inferences from what is directly stated in the passage or the synthesis of ideas and information from various parts of the passage, especially as the passages become longer and more difficult. Therefore, the answer to a question is sometimes not to be found in one or two key sentences or sections of the passage.

Time management: In both the Reading section and the Listening section, the examinee controls the amount of time used to answer a question. It is therefore the examinee's responsibility to monitor time usage while answering and to manage time spent during the overall test.

The examinee should **not** spend too much time on any one answer. Also, because of the way the test is scored, the examinee should use the time carefully to ensure that all of the questions at or below his or her ability are answered thoroughly. For the Upper Range Test, examinees should ensure that, for any particular passage, all of the questions related to that passage are answered.

Part 2 Test Procedures

7. Test Procedures Overview

This section is to help prospective examinees become familiar with the test procedures of the DLPT5 constructed-response Reading and Listening tests. First, there will be a short description of what the examinees see before the actual test begins. Then screen shots of what examinees will see on the computer screen will be provided.

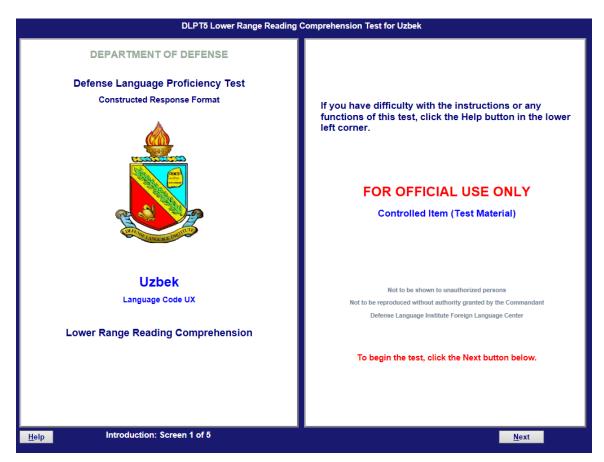

At the beginning of the test session, the examinee logs on to the system using a Common Access Card (CAC) or a user ID and password that were provided when the examinee registered to take the test. The examinee must click on the [CAC Logon] or [Submit] button before moving to the next screen.

Once the test has been selected, a series of introductory screens appears. These screens contain the Privacy Act Statement, the Disclaimer for Defense Language Institute Tests, the Test Administration Statement (of the examinee's ability to take the test at that time), and the Non-Disclosure Statement. The examinee must click on the indicated checkboxes under the Disclaimer and the Non-Disclosure Statement before moving to the next screen.

DLPT5 Lower Range Reading Comprehension Test for Uzbek

Privacy Act Statement:

Disclosure of requested information is solicited under the authority of Title 10, United States Codes 3013, Army Regulation 350-20 and Executive Order 9397 and is mandatory. Social Security Number is used as the personal identifier number of all personnel under control of the Department of Defense, and is used in connection with updating information in official records and training files. Use of Social Security Number provides for objective scoring of Defense Language Institute tests, as the examinee's Social Security Number is the only identifier so as to maintain confidentiality when reporting test scores to examinees. Failure to provide Social Security Number may result in misidentification and non-credit for tests, and/or inadequate counseling and guidance.

Disclaimer for Defense Language Institute Tests:

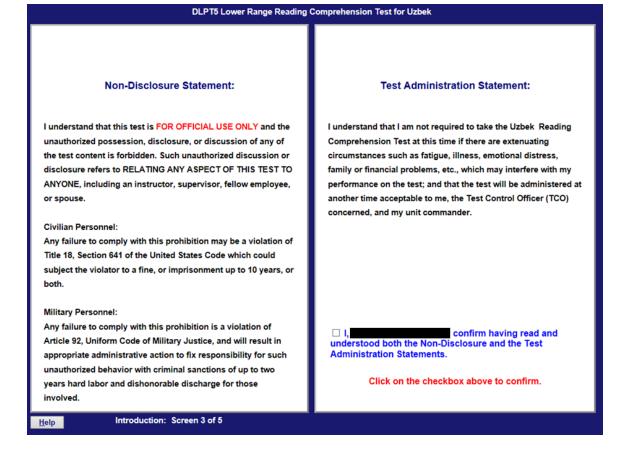

Materials for this test come from authentic sources within the target culture. These sources often include conversations or written material of a controversial nature which are essential for understanding world events. As a result, there may be topics, ideas, and language in the areas of politics, international relations, mores, etc., that may be considered contentious. The presence of controversial statements on a test should not be construed as representing the opinions of the test development team, the Defense Language Institute Foreign Language Center, or the Department of the Army.

□ I, _____, confirm having read and understood both the Privacy Act Statement and the Disclaimer.

Click on the checkbox above to confirm.

Part 3 Sample Passages

11. Reading Comprehension sample passages

Below are some sample passages, questions, and answers. Note that it is not necessary to provide the exact wording of the answers in order to get credit; any response that expresses the KEY IDEAS is correct.

Sample Passage: ILR Level 1

A letter from a father to a son

Zuwa ga Maigari,

Ina matuƙar farin ciki da samun wannan aikin naka. Ka yi ƙoƙari sosai da nuna himma. Bayan haka, idan ka fara samun albashi sai ka yi tanadi. Mun taɓa magana da mahaifiyarka cewa ya kamata ka sayi gida.

Allah ya taimaka. Gambo.

What is one piece of advice given in the first part of the letter?

Any one of the following

- Work hard (at the new job).
- Be dedicated (at the new job).

This passage is a letter from a father to a son. The letter provides advice to the son to work hard and to be dedicated to his job. Any formulation that conveys either of these ideas will be awarded credit.

According to the letter, what is one thing that Maigari's mother and father want Maigari to do?

Any one of the following

- Save money (to buy a house).
- Buy a house.

This letter also lists two things that Maigari's parents want their son to do. According to the letter, the parents want their son to save money and to buy a house. Any formulation that includes either of these ideas will be credited.

Sample Passage: ILR Level 2

A news report in a local newspaper

A shirye-shiryen zuwan Shugaban ƙasa zuwa Jihar Filato a yau, an baza matakan tsaro ciki da wajen Jihar, musamman a manyan titunan Jihar waɗanda suka dangana da filin wasan Rwanpam, inda shugaban zai gudanar da taron.

'Yan kasuwa da ke baje ƙolin kayansu a kasuwar Taminus da ke Jos, an hana su kasa kayansu a wajen kamar yadda suka saba, saboda titin Ahmadu Bello an cika shi da matakan tsaro, kuma an hana motoci bi kan hanyar.

Harkokin kasuwanci sun tsaya cik a kan titin Murtala Muhammed, da Ahmadu Bello, da titin Masallacin Juma'a har zuwa titin Tafawa, waɗanda ke kusa da wajen taron.

Shagunan Inyamurai ma ba a buɗe ba, saboda tsoron rikicin da ya faru ranar Talata da rana, saboda gudun sake aukuwar irinsa.

Rundunar 'yan sanda a Jihar ta ce ta ɗauki matakan tsaron, da za su tabbatar da Shugaban ƙasar ya zo kuma ya koma cikin ƙoshin lafiya.

What event is reported to take place in Plateau AND what are TWO steps that were taken in the surrounding areas in order to prepare for the event?

The following

- A visit by the head of the state/president.
- Market people/vendors are prevented from displaying their wares/ goods.
- The area will be filled with security personnel.
- Cars have been prevented from passing along the road. // Traffic in the area is stopped/controlled.
- Commercial activities will be (completely) halted/stopped.

This passage is a local news report that informs readers about upcoming visit of the head of state to the Plateau state. According to the report, several steps will be taken in preparation for the event. The merchants will not be able to display their goods, security personnel will monitor the area, and the traffic in the area has been stopped as well as some stores were closed off. Any formulation that specifies the event itself and any two points that reflect the steps that were taken in preparation for the event will be awarded credit.

According to the report, what is the reason the Igbo stores are closed?

Any one of the following

• (For) The fear of (re)occurrence of a crisis/riot/panic.

• To prevent another/possible crisis/riot/panic.

According to the report, the Igbo stores were not open for the fear of reoccurrence of recent crisis. Any formulation that reflects this idea will be awarded credit.

Sample Passage: ILR Level 3

From an article in a local newspaper

An shawarci masu ruwa da tsaki kan harkar ilimi na kowane mataki a Nijeriya su ƙara kason kasafin kuɗin da ake ware wa harkar ilimi don a sauƙaƙa tsadar kuɗin karatu da masu ƙaramin ƙarfi ke fuskanta wajen bayar da ilimi mai nagarta ga 'ya'yansu.

Alhaji Dahiru Mohammed Kafin Madaki, wani ɗan kasuwa kuma masanin albarkatun ƙasa, da ke zaune a Legas ne ye bayyana haka cikin hirarsa da manema labarai, inda ya ƙara da cewa idan aka waiwaya baya game da yadda iyaye da malamai suka haɗa hannu wajen tarbiyyar masu mulkin wannan lokaci kyauta, za a fahimci cewa a yanzu akwai naƙasu ga yaran da ke tasowa musamman ganin yadda a kullum al'amurra ke ƙara taɓarɓarewa a harkar karatu duk da cewa arziƙin da ake samu yanzu ya fi na da nesa ba kusa ba.

Ya ce tun da ƙasar akwai ƙarfin arziƙi ya kamata a ƙara kasafin kuɗi don cike gurbin abin da ake karɓa hannun yara wanda yake tsawala kuɗin karatu a kullum, kuma ana gama karatun ba aikin yi.

Ya ce an bar tsari ta hanyar rashin tanadar wani abu mai ɗorewa don matasan, da suka yi karatu amma ba a samar musu aiki ba.

What contradiction does Alhaji Mohammed identify regarding the wealth of the nation?

Any one of the following

- It/The wealth of the nation is greater than in the past, but the education system continues to deteriorate / is worse.
- It/The wealth of the nation is greater than in the past, but students have (more) financial problems.

This passage is from a newspaper article that brings attention to the need for increased funding in the sector of education. Alhaji Mohammend, an economic expert cited in this article, points out the deteriorating educational situation in contrast to the rising wealth of the nation. Any formulation that supports this idea will be awarded credit.

According to Alhaji Mohammed, what is the reason the government went off the track?

The following

• The government failed to create long-term solutions / provide employment for young people who have completed their studies.

In this article, Alhaji Mohammed also points out that the government failed by neglecting to provide employment for those young people who have completed their studies. Any formulation of this idea will be awarded credit.

12. Listening Comprehension Sample Passages

Note: Examinees will not see passage transcripts in an actual DLPT5 Listening test.

Sample Passage: ILR Level 1

From a conversation between a student and a security officer at a college

(N2): Namiji 2 (Male 2)

What does the student ask about?

Any one of the following

- Directions to / The location of the library.
- How far it is to the library.

This passage is a conversation between a student and a security officer. In this conversation, the student is asking for directions to the library. Any formulation that expresses this inquiry will be awarded credit.

What is one piece of information provided by the security officer?

Any one of the following

• Follow the route near / Go toward the Center for the Study of Nigerian Languages.

- It/The library is close to the Hausa Department.
- It/The library is in a red building.
- It/The library is a 10-minute walk.
- He/The student can call (the security office) if he gets lost.

In this conversation the security officer is being helpful to the student by providing the information on the location of the library, the color of the building where the library is situated, as well as the distance from the security office. Any formulation that identifies one of the pieces of information mentioned by the security officer will be awarded credit.

Sample Passage: ILR Level 2

From a local news broadcast

Transcription:

(M): Rohotani daga Funtua cikin jihar Kastina sun tabbatar da Konewa kashi ɗaya na shagonni na babbar kasuwar garin. Inda aka kyauta asaran dukiya ta miliyoyin naira ta ƙone kurmus.

Rahotani suka ce sashin da ake kiran Babbar Rumfa da iyoyi na kasuwar , ya ƙone baki ɗaya. Wai dai har yanzu babu wani bayani a sababin tashin gobara.

Game dai shugaban karamar hukumar Funtua, Alhaji Mukhtar Lawan Masta, ya ziyarci kasuwar in da ya jajarta wanda bala'in ya shafa. Har ya bukace su, su yadda da ƙandara Ubangiji.

Ya bayyana gobarar da cewa wani bala'i ne da ba karamar hukumar Funtua da gwamnati Jihar Katsina kaɗai ya shafaba, har ma da ƙasa baki ɗaya.

Alhaji Mukhtari Lawal Masta ya alkawarin yi wa gwamna Ibrahim Shehu Shema bayyanin nunin gobarar da nufin ƙargara abinda bala'in ya shafa. Ya kuma roƙi mayanta su taimaka wa wanɗanɗa bala'in gobarar ya shafa.

(M): Mace (Female)

What incident is reported in this news broadcast AND where in Funtua did it occur?

Both of the following

- There was a fire. // Property was burned.
- (Part of) The major market / shopping area in town.

This passage is from a local news broadcast that informs listeners of a fire that burned several properties in a major market in town. Any formulation that specifies both the incident and its location will be awarded credit.

What group did Chairman Masta make an appeal to AND what did he ask them to do?

Both of the following

- The well-to-do/wealthy.
- Assist those affected by the fire

In this passage, Chairman Masta of the local government appeals to the wealthy part of the population with a request to assist those who were affected by the fire. Any formulation that specifies both the group of people that Chairman Masta appeals to and the content of his plea will be awarded credit.

Sample Passage: ILR Level 3

From a radio commentary

Transcription:

(N): Namiji (Male)

What analogy does the speaker make between democracy and a child?

Any one of the following

- Democracy is like a child / child rearing. // Democracy needs to be looked after like a child.
- Patience is needed/required for democracy to develop.

This passage is from a radio commentary that draws an analogy between a child rearing process and a democracy. The speaker points out that patience and constant attention, like that given to a child, are needed in caring for a democracy in a country, just as they are required while bringing up a child. Any formulation that expresses this idea will be awarded credit.

What is the reason the speaker mentions the PDP party?

Any one of the following

• To request/recommend/ beg for people's/listeners' support of the party / its candidates (in the election).

- To promote the party / its candidates.
- He feels the expertise and knowledge of this party would have a positive effect on the country / would help democracy flourish.

In this passage, the speaker appeals to the voters with the request to support the PDP party in the upcoming elections. He strongly feels the expertise and knowledge of this party would have a positive effect on the country. Any formulation that expresses one of these ideas will be awarded credit.

Appendix: Interagency Language Roundtable Language Skill Level Descriptions

Preface

The following descriptions of proficiency levels 0, 1, 2, 3, 4, and 5 characterize spoken-language use. Each higher level implies control of the previous levels' functions and accuracy. The designation 0+, 1+, 2+, etc. will be assigned when proficiency substantially exceeds one skill level and does not fully meet the criteria for the next level. The "plus-level" descriptions, therefore, are subsidiary to the "base-level" descriptions.

A skill level is assigned to a person through an authorized language examination. Examiners assign a level on a variety of performance criteria exemplified in the descriptive statements. Therefore, the examples given here illustrate, but do not exhaustively describe, either the skills a person may possess or situations in which he/she may function effectively.

Statements describing accuracy refer to typical stages in the development of competence in the most commonly taught languages in formal training programs. In other languages, emerging competence parallels these characterizations, but often with different details.

Unless otherwise specified, the term "native speaker" refers to native speakers of a standard dialect. "Well-educated," in the context of these proficiency descriptions, does not necessarily imply formal higher education. However, in cultures where formal higher education is common, the language-use abilities of persons who have had such education is [sic] considered the standard. That is, such a person meets contemporary expectations for the formal, careful style of the language, as well as a range of less formal varieties of the language.

These descriptions may be further specified by individual agencies to characterize those aspects of language-use performance which are of insufficient generality to be included here.

Interagency Language Roundtable Language Skill Level Descriptions: Listening

Listening 0 (No Proficiency)

No practical understanding of the spoken language. Understanding is limited to occasional isolated words with essentially no ability to comprehend communication. (Has been coded L-0 in some nonautomated applications.

Listening 0+ (Memorized Proficiency)

Sufficient comprehension to understand a number of memorized utterances in areas of immediate needs. Slight increase in utterance length understood but requires frequent long pauses between understood phrases and repeated requests on the listener's part for repetition. Understands with reasonable accuracy only when this involves short memorized utterances or formulae. Utterances understood are relatively short in length. Misunderstandings arise due to ignoring or inaccurately hearing sounds or word endings (both inflectional and non-inflectional), distorting the original meaning. Can understand only with difficulty even such people as teachers who are used to speaking with non-native speakers. Can understand best those statements where context strongly supports the utterance's meaning. Gets some main ideas. (Has been coded L-0+ in some nonautomated applications.)

Listening 1 (Elementary Proficiency)

Sufficient comprehension to understand utterances about basic survival needs and minimum courtesy and travel requirements in areas of immediate need or on very familiar topics, can understand simple questions and answers, simple statements and very simple face-to-face conversations in a standard dialect. These must often be delivered more clearly than normal at a rate slower than normal with frequent repetitions or paraphrase (that is, by a native used to dealing with foreigners). Once learned, these sentences can be varied for similar level vocabulary and grammar and still be understood. In the majority of utterances, misunderstandings arise due to overlooked or misunderstood syntax and other grammatical clues. Comprehension vocabulary inadequate to understand anything but the most elementary needs. Strong interference from the candidate's native language occurs. Little precision in the information understood owing to the tentative state of passive grammar and lack of vocabulary. Comprehension areas include basic needs such as: meals, lodging, transportation, time and simple directions (including both route instructions and orders from customs officials, policemen, etc.). Understands main ideas. (Has been coded L-1 in some nonautomated applications.)

Listening 1+ (Elementary Proficiency, Plus)

Sufficient comprehension to understand short conversations about all survival needs and limited social demands. Developing flexibility evident in understanding a range of circumstances beyond immediate survival needs. Shows spontaneity in understanding by speed, although consistency of understanding is uneven. Limited vocabulary range necessitates repetition for understanding. Understands more common time forms and most question forms, some word order patterns, but miscommunication still occurs with

more complex patterns. Cannot sustain understanding of coherent structures in longer utterances or in unfamiliar situations. Understanding of descriptions and the giving of precise information is limited. Aware of basic cohesive features (e.g., pronouns, verb inflections) but many are unreliably understood, especially if less immediate in reference. Understanding is largely limited to a series of short, discrete utterances. Still has to ask for utterances to be repeated. Some ability to understand facts. (Has been coded L-1+ in some nonautomated applications.)

Listening 2 (Limited Working Proficiency)

Sufficient comprehension to understand conversations on routine social demands and limited job requirements. Able to understand face-to-face speech in a standard dialect, delivered at a normal rate with some repetition and rewording, by a native speaker not used to dealing with foreigners, about everyday topics, common personal and family news, well-known current events and routine office matters through descriptions and narration about current, past and future events; can follow essential points of discussion or speech at an elementary level on topics in his/her special professional field. Only understands occasional words and phrases of statements made in unfavorable conditions, for example through loudspeakers outdoors. Understands factual content. Native language causes less interference in listening comprehension. Able to understand facts; i.e., the lines but not between or beyond the lines. (Has been coded L-2 in some nonautomated applications.)

Listening 2+ (Limited Working Proficiency, Plus)

Sufficient comprehension to understand most routine social demands and most conversations on work requirements as well as some discussions on concrete topics related to particular interests and special fields of competence. Often shows remarkable ability and ease of understanding, but under tension or pressure may break down. Candidate may display weakness or deficiency due to inadequate vocabulary base or less than secure knowledge of grammar and syntax. Normally understands general vocabulary with some hesitant understanding of everyday vocabulary still evident. Can sometimes detect emotional overtones. Some ability to understand implications. (Has been Coded L-2+ in some nonautomated applications.)

Listening 3 (General Professional Proficiency)

Able to understand the essentials of all speech in a standard dialect including technical discussions within a special field. Has effective understanding of face-to-face speech, delivered with normal clarity and speed in a standard dialect on general topics and areas of special interest; understands hypothesizing and supported opinions. Has broad enough vocabulary that rarely has to ask for paraphrasing or explanation. Can follow accurately the essentials of conversations between educated native speakers, reasonably clear telephone calls, radio broadcasts, news stories similar to wire service reports, oral reports, some oral technical reports and public addresses on non-technical subjects; can understand without difficulty all forms of standard speech concerning a special professional field. Does not understand native speakers it they speak very quickly or use some slang or dialect. Can often detect emotional overtones. Can understand implications. (Has been coded L-3 in some nonautomated applications.)

Listening 3+ (General Professional Proficiency, Plus)

Comprehends most of the content and intent of a variety of forms and styles of speech pertinent to professional needs, as well as general topics and social conversation. Ability to comprehend many sociolinguistic and cultural references. However, may miss some subtleties and nuances. Increased ability to comprehend unusually complex structures in lengthy utterances and to comprehend many distinctions in language tailored for different audiences. Increased ability to understand native speakers talking quickly, using nonstandard dialect or slang; however, comprehension is not complete. Can discern some relationships among sophisticated listening materials in the context of broad experience. Can follow some unpredictable turns of thought readily, for example, in informal and formal speeches covering editorial, conjectural and literary material in subject matter areas directed to the general listener. (Has been coded L-3+ in some nonautomated applications.)

Listening 4 (Advanced Professional Proficiency)

Able to understand all forms and styles of speech pertinent to professional needs. Able to understand fully all speech with extensive and precise vocabulary, subtleties and nuances in all standard dialects on any subject relevant to professional needs within the range of his/her experience, including social conversations; all intelligible broadcasts and telephone calls; and many kinds of technical discussions and discourse. Understands language specifically tailored (including persuasion, representation, counseling and negotiating) to different audiences. Able to understand the essentials of speech in some non-standard dialects. Has difficulty in understanding extreme dialect and slang, also in understanding speech in unfavorable conditions, for example through bad loudspeakers outdoors. Can discern relationships among sophisticated listening materials in the context of broad experience. Can follow unpredictable turns of thought readily, for example, in informal and formal speeches covering editorial, conjectural and literary material in any subject matter directed to the general listener. (Has been coded L-4 in some nonautomated applications.)

Listening 4+ (Advanced Professional Proficiency, Plus)

Increased ability to understand extremely difficult and abstract speech as well as ability to understand all forms and styles of speech pertinent to professional needs, including social conversations. Increased ability to comprehend native speakers using extreme nonstandard dialects and slang, as well as to understand speech in unfavorable conditions. Strong sensitivity to sociolinguistic and cultural references. Accuracy is close to that of the well-educated native listener but still not equivalent. (Has been coded L-4+ in some nonautomated applications.)

Listening 5 (Functionally Native Proficiency)

Comprehension equivalent to that of the well-educated native listener. Able to understand fully all forms and styles of speech intelligible to the well-educated native listener, including a number of regional and illiterate dialects, highly colloquial speech and conversations and discourse distorted by marked interference from other noise. Able to understand how natives think as they create discourse. Able to understand extremely difficult and abstract speech. (Has been coded L-5 in some nonautomated applications.)

Interagency Language Roundtable Language Skill Level Descriptions: Reading

R-0: Reading 0 (No Proficiency)

No practical ability to read the language. Consistently misunderstands or cannot comprehend at all.

R-0+: Reading 0+ (Memorized Proficiency)

Can recognize all the letters in the printed version of an alphabetic system and highfrequency elements of a syllabary or a character system. Able to read some or all of the following: numbers, isolated words and phrases, personal and place names, street signs, office and shop designations. The above often interpreted inaccurately. Unable to read connected prose

R-1: Reading 1 (Elementary Proficiency)

Sufficient comprehension to read very simple connected written material in a form equivalent to usual printing or typescript. Can read either representations of familiar formulaic verbal exchanges or simple language containing only the highest frequency structural patterns and vocabulary, including shared international vocabulary items and cognates (when appropriate). Able to read and understand known language elements that have been recombined in new ways to achieve different meanings at a similar level of simplicity. Texts may include descriptions of persons, places or things: and explanations of geography and government such as those simplified for tourists. Some misunderstandings possible on simple texts. Can get some main ideas and locate prominent items of professional significance in more complex texts. Can identify general subject matter in some authentic texts.

R-1+: Reading 1+ (Elementary Proficiency, Plus)

Sufficient comprehension to understand simple discourse in printed form for informative social purposes. Can read material such as announcements of public events, simple prose containing biographical information or narration of events, and straightforward newspaper headlines. Can guess at unfamiliar vocabulary if highly contextualized, but with difficulty in unfamiliar contexts. Can get some main ideas and locate routine information of professional significance in more complex texts. Can follow essential points of written discussion at an elementary level on topics in his/her special professional field.

In commonly taught languages, the individual may not control the structure well. For example, basic grammatical relations are often misinterpreted, and temporal reference may rely primarily on lexical items as time indicators. Has some difficulty with the cohesive factors in discourse, such as matching pronouns with referents. May have to read materials several times for understanding.

R-2: Reading 2 (Limited Working Proficiency)

Sufficient comprehension to read simple, authentic written material in a form equivalent to usual printing or typescript on subjects within a familiar context. Able to read with some misunderstandings straightforward, familiar, factual material, but in general

insufficiently experienced with the language to draw inferences directly from the linguistic aspects of the text. Can locate and understand the main ideas and details in material written for the general reader. However, persons who have professional knowledge of a subject may be able to summarize or perform sorting and locating tasks with written texts that are well beyond their general proficiency level. The individual can read uncomplicated, but authentic prose on familiar subjects that are normally presented in a predictable sequence which aids the reader in understanding. Texts may include descriptions and narrations in contexts such as news items describing frequently occurring events, simple biographical information, social notices, formulaic business letters, and simple technical material written for the general reader. Generally the prose that can be read by the individual is predominantly in straightforward/high-frequency sentence patterns. The individual does not have a broad active vocabulary (that is, which he/she recognizes immediately on sight), but is able to use contextual and real-world cues to understand the text. Characteristically, however, the individual is quite slow in performing such a process. Is typically able to answer factual questions about authentic texts of the types described above.

R-2+: Reading 2+ (Limited Working Proficiency, Plus)

Sufficient comprehension to understand most factual material in non-technical prose as well as some discussions on concrete topics related to special professional interests. Is markedly more proficient at reading materials on a familiar topic. Is able to separate the main ideas and details from lesser ones and uses that distinction to advance understanding. The individual is able to use linguistic context and real-world knowledge to make sensible guesses about unfamiliar material. Has a broad active reading vocabulary. The individual is able to get the gist of main and subsidiary ideas in texts which could only be read thoroughly by persons with much higher proficiencies. Weaknesses include slowness, uncertainty, inability to discern nuance and/or intentionally disguised meaning.

R-3: Reading 3 (General Professional Proficiency)

Able to read within a normal range of speed and with almost complete comprehension a variety of authentic prose material on unfamiliar subjects. Reading ability is not dependent on subject matter knowledge, although it is not expected that the individual can comprehend thoroughly subject matter which is highly dependent on cultural knowledge or which is outside his/her general experience and not accompanied by explanation. Text-types include news stories similar to wire service reports or international news items in major periodicals, routine correspondence, general reports, and technical material in his/her professional field; all of these may include hypothesis, argumentation and supported opinions. Misreading rare. Almost always able to interpret material correctly, relate ideas and "read between the lines," (that is, understand the writers' implicit intents in text of the above types). Can get the gist of more sophisticated texts, but may be unable to detect or understand subtlety and nuance. Rarely has to pause over or reread general vocabulary. However, may experience some difficulty with unusually complex structure and low frequency idioms.

R-3+: Reading 3+ (General Professional Proficiency, Plus)

Can comprehend a variety of styles and forms pertinent to professional needs. Rarely misinterprets such texts or rarely experiences difficulty relating ideas or making inferences. Able to comprehend many sociolinguistic and cultural references. However, may miss some nuances and subtleties. Able to comprehend a considerable range of intentionally complex structures, low frequency idioms, and uncommon connotative intentions, however, accuracy is not complete. The individual is typically able to read with facility, understand, and appreciate contemporary expository, technical or literary texts which do not rely heavily on slang and unusual items.

R-4: Reading 4 (Advanced Professional Proficiency)

Able to read fluently and accurately all styles and forms of the language pertinent to professional needs. The individual's experience with the written language is extensive enough that he/she is able to relate inferences in the text to real-world knowledge and understand almost all sociolinguistic and cultural references. Able to "read beyond the lines" (that is, to understand the full ramifications of texts as they are situated in the wider cultural, political, or social environment). Able to read and understand the intent of writers' use of nuance and subtlety. The individual can discern relationships among sophisticated written materials in the context of broad experience. Can follow unpredictable turns of thought readily in, for example, editorial, conjectural, and literary texts in any subject matter area directed to the general reader. Can read essentially all materials in his/her special field, including official and professional documents and correspondence. Recognizes all professionally relevant vocabulary known to the educated non-professional native, although may have some difficulty with slang. Can read reasonably legible handwriting without difficulty. Accuracy is often nearly that of a well-educated native reader.

R-4+: Reading 4+ (Advanced Professional Proficiency, Plus)

Nearly native ability to read and understand extremely difficult or abstract prose, a very wide variety of vocabulary, idioms, colloquialisms and slang. Strong sensitivity to and understanding of sociolinguistic and cultural references. Little difficulty in reading less than fully legible handwriting. Broad ability to "read beyond the lines" (that is, to understand the full ramifications of texts as they are situated in the wider cultural, political, or social environment) is nearly that of a well-read or well-educated native reader. Accuracy is close to that of the well-educated native reader, but not equivalent.

R-5: Reading 5 (Functionally Native Proficiency)

Reading proficiency is functionally equivalent to that of the well-educated native reader. Can read extremely difficult and abstract prose; for example, general legal and technical as well as highly colloquial writings. Able to read literary texts, typically including contemporary avant-garde prose, poetry and theatrical writing. Can read classical/archaic forms of literature with the same degree of facility as the well-educated, but nonspecialist native. Reads and understands a wide variety of vocabulary and idioms, colloquialisms, slang, and pertinent cultural references. With varying degrees of difficulty, can read all kinds of handwritten documents. Accuracy of comprehension is equivalent to that of a well-educated native reader.
